

OFFICE AUTOMATION TOOLS

Unit-II: Introduction to Windows and File Management

Comprehensive Study Notes

1. Introduction to Windows 2007

1.1 What is Windows 2007?

Windows 2007 (Windows Vista) is a **graphical user interface (GUI) operating system** developed by Microsoft. It was released in January 2007 as the successor to Windows XP. The name "Vista" refers to the new visual experience it offered to users.

1.2 Features of Windows 2007

Feature	Description
Aero Interface	Glass-like visual effects with transparent windows
Ribbon Interface	New toolbar system in Office applications
Search	Instant search in Start menu and folders
User Account Control	Security feature for system changes
Sidebar	Gadgets for weather, clock, news
Windows Explorer	Improved file management with preview pane
Network Center	Simplified network management

1.3 Benefits of Windows 2007

Benefit	Description
User-Friendly	GUI makes it easy to use
Multi-Tasking	Run multiple applications simultaneously
Plug and Play	Automatic hardware detection

Visual Interface	Icons, windows, and menus
File Management	Easy file organization
Networking	Built-in network support
Security	User accounts and permissions
Multimedia	Built-in support for audio and video

1.4 Uses of Windows 2007

Use	Description
Personal Computing	Daily tasks, internet, entertainment
Office Work	Document creation, spreadsheets
Education	Learning and research
Business	Professional applications
Communication	Email, messaging, video calls
Design	Graphics, multimedia

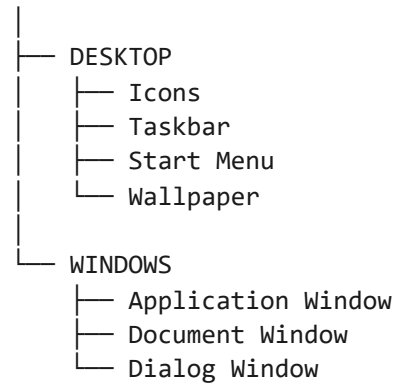

2. Graphical User Interface (GUI)

2.1 What is GUI?

GUI (Graphical User Interface) is a **visual way of interacting** with a computer using icons, windows, and menus instead of typing commands.

2.2 Components of GUI

GUI COMPONENTS

2.3 Desktop

The Desktop is the **main screen** that appears after Windows starts. It is the working area where users interact with the computer.

Desktop Components

Component	Description
Icons	Small pictures representing programs, files, or folders
Taskbar	Horizontal bar at the bottom of the screen
Start Button	Opens the Start Menu
Notification Area	System tray with clock and notifications

Desktop Background	Wallpaper or image on the desktop
Shortcuts	Icons that launch programs quickly

2.4 The Window

A window is a **rectangular area** on the screen where an application or document is displayed.

Components of a Window

Component	Description
Title Bar	Displays the program and document name
Menu Bar	Contains menus like File, Edit, View
Toolbar	Contains buttons for common actions
Ribbon	New toolbar system in Office 2007
Status Bar	Displays information about the document
Scroll Bars	For navigating through content

Application Window

The Application Window is the **main window** for a program like Word or Excel.

Components: Title Bar, Menu Bar/Ribbon, Toolbars, Document Window, Status Bar

Controls:

- **Minimize Button:** Hides the window to taskbar
- **Maximize Button:** Expands window to full screen
- **Close Button:** Closes the application

Document Window

The Document Window is the **working area** inside an application where the actual document content is displayed.

Components: Cursor/Insertion Point, Scroll Bars, Rulers, Zoom Controls

Dialog Window

A Dialog Window is a **special window** that appears to request information or provide options.

Components: Text Boxes, Drop-down Lists, Radio Buttons, Check Boxes, OK/Cancel Buttons

2.5 Icons

Icons are **small graphical representations** of programs, files, folders, or system functions.

Icon Type	Description	Example
Application Icon	Launches a program	Word icon, Excel icon
File Icon	Represents a document	.docx file, .xlsx file
Folder Icon	Represents a folder	Yellow folder
System Icon	System functions	Recycle Bin, My Computer
Shortcut Icon	Quick launch	Arrow on bottom-left

3. Windows Explorer

3.1 What is Windows Explorer?

Windows Explorer is a **file management tool** that allows users to browse, organize, and manage files and folders on the computer.

3.2 Windows Explorer Features

Feature	Description
Navigation Pane	Tree view of folders and drives
Address Bar	Shows current path and location
Search Box	Search for files and folders
Preview Pane	Preview selected files
Views	Icons, List, Details, Tiles, Content
Sort and Filter	Organize files by various criteria

3.3 Navigating in Windows Explorer

Navigation Methods

Method	Description
Address Bar	Type or select a location
Navigation Pane	Click on any folder or drive
Back/Forward	Navigate through history
Up Arrow	Move to parent folder

Search Box	Search for specific files
-------------------	---------------------------

Drives in Windows Explorer

Drive	Description
C:	Local Hard Disk (System Drive)
D:	Additional Hard Disk or CD/DVD Drive
E:	CD/DVD Drive or External Drive
USB Drive	Removable Storage

4. Control Panel

4.1 What is Control Panel?

Control Panel is a **system settings management tool** that allows users to view and change system settings.

4.2 Control Panel Categories

Category	Settings
Appearance and Personalization	Wallpaper, themes, fonts
Clock, Language, and Region	Date, time, language
Hardware and Sound	Printers, mouse, sound
Network and Internet	Network connections, internet settings
Programs	Add/Remove programs
System and Security	System information, firewall, updates
User Accounts	User creation, password
Ease of Access	Accessibility options

4.3 Common Control Panel Tasks

Task	Location
Change Wallpaper	Appearance and Personalization
Install/Uninstall Programs	Programs
View System Information	System and Security

Add a Printer	Hardware and Sound
Change Date/Time	Clock, Language, and Region
Create User Account	User Accounts

5. Setting Wallpaper, Screen Saver, and Background

5.1 Setting Wallpaper

Steps:

1. Right-click on the desktop
2. Select **Personalize**
3. Click **Desktop Background**
4. Browse and select an image
5. Click **OK**

5.2 Setting Screen Saver

Steps:

1. Right-click on the desktop
2. Select **Personalize**
3. Click **Screen Saver**
4. Choose a screen saver
5. Set wait time
6. Click **OK**

5.3 Setting Background Color

Steps:

1. Right-click on the desktop
2. Select **Personalize**
3. Click **Windows Color**
4. Choose a color
5. Click **OK**

6. File and Folder Management

6.1 Creating a Folder

Method 1: Using Right-Click

1. Right-click in the desired location
2. Select **New** → **Folder**
3. Type the folder name
4. Press **Enter**

Method 2: Using Command

1. Open Windows Explorer
2. Click **New Folder** in the toolbar
3. Type the folder name
4. Press **Enter**

6.2 Copying and Moving Files

Operation	Method	Description
Copy	Ctrl+C	Copy file to clipboard
Paste	Ctrl+V	Paste copied file
Copy	Right-click → Copy	Copy file
Paste	Right-click → Paste	Paste file
Cut	Ctrl+X	Cut file (move)
Copy-Drag	Drag with Ctrl	Copy to new location
Move-Drag	Drag	Move to new location

6.3 Copying a File

Method 1: Copy and Paste

1. Select the file
2. Press **Ctrl+C** or Right-click → Copy
3. Navigate to destination
4. Press **Ctrl+V** or Right-click → Paste

Method 2: Drag and Drop

1. Select the file
2. Drag to destination
3. Release mouse button

6.4 Moving a File

Method 1: Cut and Paste

1. Select the file
2. Press **Ctrl+X** or Right-click → Cut
3. Navigate to destination
4. Press **Ctrl+V** or Right-click → Paste

Method 2: Drag and Drop

1. Select the file
2. Drag to destination (same drive = move)

7. Disk Management

7.1 Scandisk (Check Disk)

Purpose: Checks the disk for errors and fixes them.

How to Run:

1. Open **My Computer**
2. Right-click the drive
3. Select **Properties**
4. Click **Tools** tab
5. Click **Check Now**
6. Select options
7. Click **Start**

7.2 Checking Disk Space

Method 1: Properties

1. Open **My Computer**
2. Right-click the drive
3. Select **Properties**
4. View used and free space

Method 2: Disk Management

1. Right-click **My Computer**
2. Select **Manage**
3. Select **Disk Management**
4. View disk space

7.3 Formatting a Disk

Purpose: Prepares a disk to accept data by creating a file system.

Steps:

1. Open **My Computer**
2. Right-click the drive
3. Select **Format**
4. Choose file system (FAT32, NTFS)
5. Enter Volume Label
6. Click **Start**

7.4 Formatting Options

File System	Max Size	Usage
FAT32	4 GB file, 8 TB volume	USB drives
NTFS	16 TB file, 256 TB volume	Hard disks

8. Compressing/Ziping Files (WinZip)

8.1 What is File Compression?

File compression reduces the **size of files** for easier storage and faster transfer.

8.2 Ziping Files (Compress)

Method 1: Using Windows

1. Select the files
2. Right-click → **Send To** → **Compressed (zipped) Folder**
3. A new .zip file is created

Method 2: Using WinZip

1. Open WinZip
2. Select files
3. Click **Add**
4. Choose compression options
5. Click **Zip**

8.3 Unziping Files (Extract)

Method 1: Using Windows

1. Right-click the .zip file
2. Select **Extract All**
3. Choose destination
4. Click **Extract**

Method 2: Using WinZip

1. Open the .zip file
2. Select files

3. Click **Extract**
4. Choose destination
5. Click **Extract**

8.4 Benefits of Compression

Benefit	Description
Save Space	Reduces file size
Faster Transfer	Less data to transfer
Organize	Multiple files in one archive
Security	Can add password protection

9. Virus and Antivirus

9.1 What is a Virus?

A virus is a **malicious program** that can replicate itself and spread from one computer to another.

9.2 Types of Viruses

Type	Description
File Virus	Infests executable files
Boot Sector Virus	Infests boot sector
Macro Virus	Infests documents
Trojan Horse	Disguised as legitimate software
Worm	Self-replicating, spreads via network
Ransomware	Locks files and demands ransom

9.3 Symptoms of Virus Infection

Symptom	Description
Slow Performance	Computer runs slower
Unexpected Errors	Programs crash
File Loss	Files disappear
Pop-ups	Unwanted advertisements
Unexpected Behavior	Programs act strangely

High Network Activity

Network usage without reason

9.4 Antivirus Software

Purpose: Detects, prevents, and removes viruses.

Popular Antivirus Programs:

- Norton Antivirus
- McAfee Antivirus
- Kaspersky Antivirus
- Avast Antivirus
- AVG Antivirus

9.5 Antivirus Features

Feature	Description
Real-time Scanning	Scans files as they are accessed
Scheduled Scanning	Scans at set times
Virus Definitions	Database of known viruses
Quarantine	Isolates infected files
Automatic Updates	Updates virus definitions

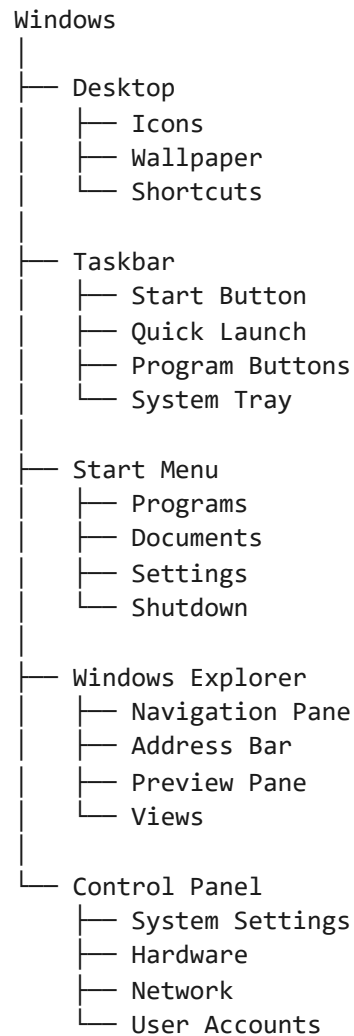

9.6 Protection Measures

Measure	Description
Install Antivirus	Use reliable antivirus software
Keep Updated	Update virus definitions regularly
Scan Attachments	Scan email attachments

Avoid Suspicious Links	Don't click unknown links
Backup Data	Regular backups

10. Quick Revision

Windows Components Summary

File Operations Summary

Operation	Keyboard Shortcut
Copy	Ctrl+C
Cut	Ctrl+X
Paste	Ctrl+V

Select All	Ctrl+A
Undo	Ctrl+Z
Delete	Delete
Rename	F2

Key Points to Remember

- GUI makes computing easier with visual elements
- The Desktop is the main screen
- The Taskbar shows running programs
- Windows Explorer manages files and folders
- Control Panel changes system settings
- Recycle Bin stores deleted files
- Viruses are malicious programs
- Antivirus protects against viruses

11. Questions

11.1 Short Answer Questions (2-5 Marks)

1. What is GUI? Name its components.
2. What are the features of Windows 2007?
3. What is the Control Panel? What is it used for?
4. How do you set wallpaper and screen saver?
5. What is Windows Explorer?
6. How do you create a folder?
7. What is the difference between copying and moving a file?
8. What is Scandisk? Why is it used?
9. What is file compression? Why is it used?
10. What is a virus? How does it spread?
11. What is antivirus software? Give examples.
12. What are the common symptoms of virus infection?
13. What is the Recycle Bin? How does it work?
14. What is the Taskbar? What are its components?
15. How do you format a disk?

11.2 Long Answer Questions (10 Marks)

1. Explain the features and benefits of Windows 2007.
2. Explain the GUI components of Windows with examples.
3. Explain the Control Panel and its functions.
4. Explain file and folder management in Windows.
5. Explain disk management tools - Scandisk, Check disk, and Format.
6. Explain file compression and WinZip.
7. Explain viruses and antivirus software in detail.
8. Explain Windows Explorer and its features.

11.3 Objective Questions (1 Mark)

1. The main screen of Windows is called:
(a) Desktop (b) Taskbar (c) Window (d) Control Panel

Answer: (a)

2. Which component is at the bottom of the screen?
(a) Desktop (b) Taskbar (c) Title Bar (d) Menu Bar

Answer: (b)

3. Which key is used to copy a file?
(a) Ctrl+C (b) Ctrl+V (c) Ctrl+X (d) Ctrl+Z

Answer: (a)

4. Which key is used to paste a file?
(a) Ctrl+C (b) Ctrl+V (c) Ctrl+X (d) Ctrl+Z

Answer: (b)

5. Which key is used to cut a file?
(a) Ctrl+C (b) Ctrl+V (c) Ctrl+X (d) Ctrl+Z

Answer: (c)

6. Recycle Bin stores:
(a) Copied files (b) Deleted files (c) System files (d) Programs

Answer: (b)

7. Control Panel is used for:
(a) System Settings (b) File Management (c) Internet Browsing (d) None

Answer: (a)

8. Which is a virus symptom?
(a) Slow performance (b) File loss (c) Pop-ups (d) All of the above

Answer: (d)

9. File compression is used to:
(a) Increase size (b) Decrease size (c) Change name (d) None

Answer: (b)

10. Which file system is used in Windows?
(a) FAT32 (b) NTFS (c) Both (d) None

Answer: (c)
