

OFFICE AUTOMATION TOOLS

Unit-IV: Presentations (MS PowerPoint 2007)

Comprehensive Study Notes

1. Introduction to MS PowerPoint 2007

1.1 What is MS PowerPoint?

Microsoft PowerPoint is a **presentation software** developed by Microsoft. It is used to create **slide shows** for business presentations, educational lectures, and personal use.

1.2 Benefits of MS PowerPoint

Benefit	Description
Visual Communication	Present information visually with images, graphics, and text
Professional Presentation	Create professional-looking presentations
Audience Engagement	Keep audience engaged with animations and multimedia
Reusability	Templates can be reused for multiple presentations
Easy to Update	Quickly modify content and slides
Multiple Outputs	Print, present, or export as PDF
Integration	Integrates with other Office applications

1.3 Features of MS PowerPoint 2007

Feature	Description
Ribbon Interface	New toolbar system replacing menus
Slide Layouts	Pre-designed slide layouts
Design Themes	Professional design templates

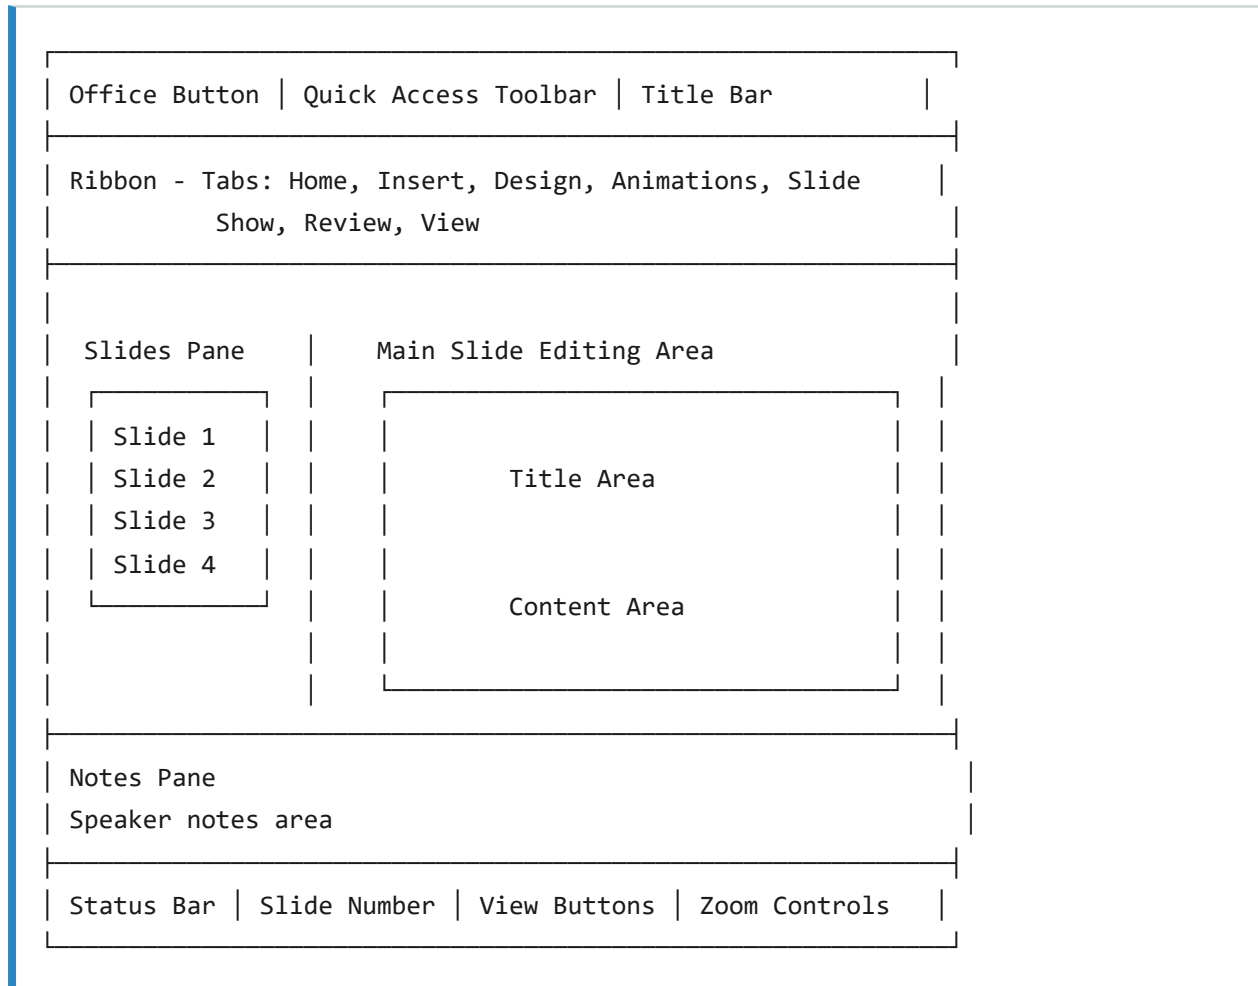

Animations	Text and object animations
Transitions	Slide transition effects
Multimedia Support	Insert audio, video, and images
SmartArt	Professional diagrams and charts
Slide Master	Consistent design across slides
Action Buttons	Navigation buttons
Macros	Automate repetitive tasks

1.4 Uses of MS PowerPoint

Use	Description
Business Presentations	Sales pitches, company meetings
Education	Lectures, tutorials, training
Seminars and Conferences	Research presentations
Product Demonstrations	Showcase products
Event Planning	Event schedules, announcements
Personal Use	Photo albums, family events
Reports	Annual reports, project reports

2. MS PowerPoint 2007 Interface

2.1 PowerPoint Window Components

2.2 Key Components

Component	Description
Office Button	File menu (New, Open, Save, Print)
Quick Access Toolbar	Common commands (Save, Undo, Redo)
Title Bar	Shows program and presentation name
Ribbon	Main toolbar with tabs and commands

Slides Pane	Displays all slides as thumbnails
Main Slide Area	Editing area for current slide
Notes Pane	Speaker notes area
Status Bar	Shows slide number and other information
View Buttons	Switch between views

2.3 Ribbon Tabs

Tab	Description
Home	Insert slides, formatting, editing
Insert	Insert tables, images, charts, media
Design	Themes, colors, fonts, background styles
Animations	Animation effects, transitions
Slide Show	Start slide show, rehearsal
Review	Spell check, comments, protection
View	Presentation views, master views

3. Creating and Editing Slides

3.1 Creating a New Presentation

Method 1: Using Office Button

1. Click Office Button → New
2. Choose Blank Presentation or Template
3. Click Create

Method 2: Using Keyboard Shortcut

Press **Ctrl+N**

3.2 Adding a New Slide

Method 1: Using Ribbon

1. Home Tab → New Slide
2. Choose a slide layout

Method 2: Using Keyboard Shortcut

Press **Ctrl+M**

Method 3: Using Right-click

1. Right-click in Slides Pane
2. Select New Slide

3.3 Slide Layouts

Layout	Description
Title Slide	Title and subtitle

Title and Content	Title and content area
Section Header	Section divider
Two Content	Title and two content areas
Comparison	Title and two content areas with labels
Title Only	Title only
Blank	Blank slide
Content with Caption	Content with caption area

3.4 Adding Content to Slides

Text

1. Click the placeholder text
2. Type the text

Images

1. Insert Tab → Picture
2. Browse and select image
3. Click Insert

Tables

1. Insert Tab → Table
2. Select rows and columns
3. Enter data

Charts

1. Insert Tab → Chart
2. Choose chart type
3. Enter data in Excel window

4. Inserting Graphics and Multimedia

4.1 Inserting Pictures

Steps:

1. Insert Tab → Picture
2. Browse to find the picture
3. Select the picture
4. Click Insert

Picture Tools

After inserting, you can:

- Resize the picture
- Crop the picture
- Adjust brightness and contrast
- Apply picture effects
- Add borders and frames

4.2 Inserting Clip Art

Steps:

1. Insert Tab → Clip Art
2. Search for clip art
3. Select the clip art
4. Click Insert

4.3 Inserting SmartArt

What is SmartArt?

SmartArt is a **graphic representation** of information, such as flowcharts, cycles, and hierarchies.

Steps:

1. Insert Tab → SmartArt
2. Choose a type (List, Process, Cycle, Hierarchy)
3. Choose a layout
4. Click OK
5. Enter the text

4.4 Inserting WordArt

Steps:

1. Insert Tab → WordArt
2. Choose a style
3. Type the text
4. Format as needed

4.5 Inserting Audio

Steps:

1. Insert Tab → Audio → Audio from File
2. Browse and select audio file
3. Click Insert
4. Set playback options (play automatically or on click)

4.6 Inserting Video

Steps:

1. Insert Tab → Video → Video from File
2. Browse and select video file
3. Click Insert
4. Set playback options

5. Slide Transitions

5.1 What are Transitions?

Transitions are **visual effects** that appear when moving from one slide to the next in a presentation.

5.2 Transition Effects

Category	Examples
Subtle	Fade, Push, Wipe, Split
Exciting	Curtains, Drape, Prestige, Wind
Dynamic Content	Pan, Ferris Wheel, Conveyor, Fly

5.3 Adding Transitions

Steps:

1. Select the slide
2. Animations Tab → Transition to This Slide
3. Choose a transition effect

Transition Options

Option	Description
Sound	Sound effect during transition
Duration	Length of transition (seconds)
Advance Slide	On Mouse Click or Automatically After

Apply to All	Apply transition to all slides
--------------	--------------------------------

5.4 Transition Timing

Steps:

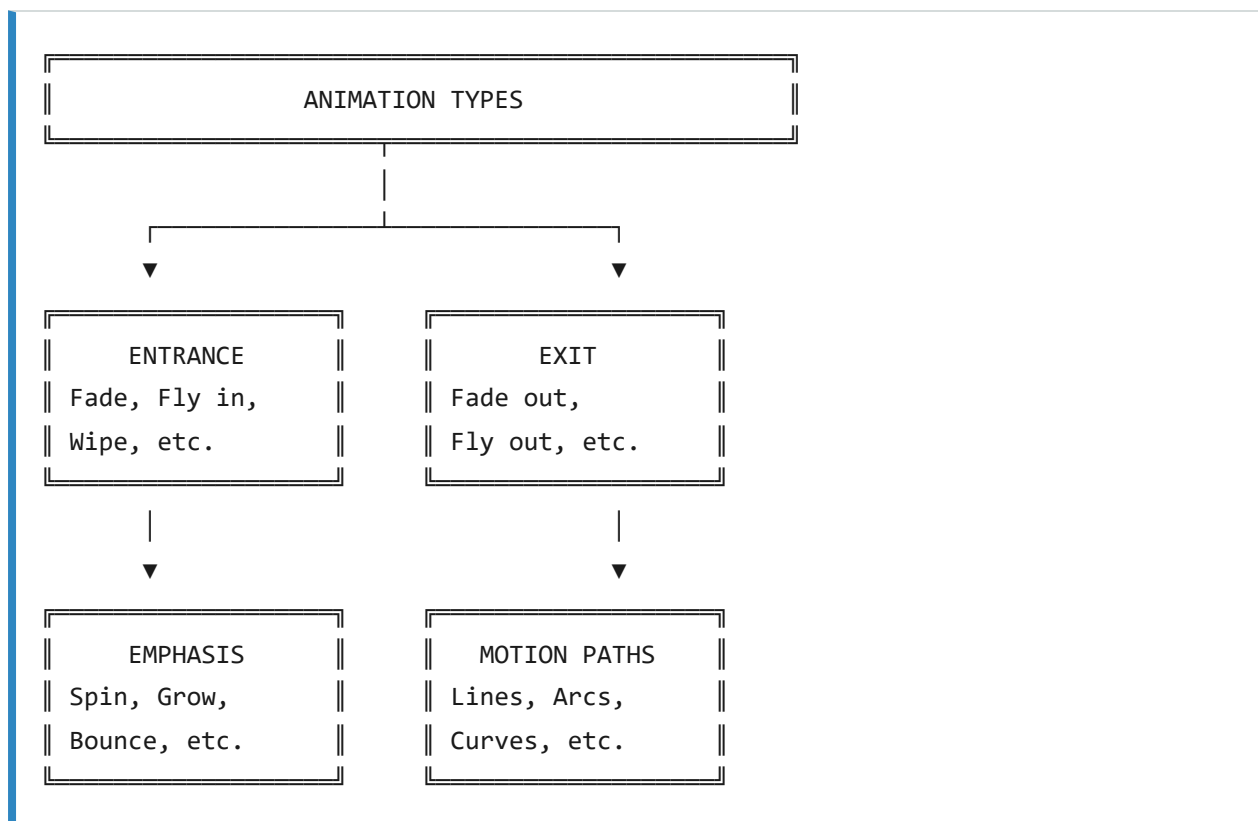

1. Animations Tab → Transition to This Slide
2. In the Timing group:
 - **Sound:** Choose a sound effect
 - **Duration:** Set transition speed
 - **Advance Slide:** On Mouse Click or After

6. Animations

6.1 What is Animation?

Animation adds **visual effects** to text, images, and objects in a presentation to make it more dynamic and engaging.

6.2 Types of Animations

6.3 Adding Animation

Steps:

1. Select the object
2. Animations Tab → Add Animation
3. Choose an animation effect

Animation Effects Categories:

- **Entrance:** How objects enter the slide
- **Emphasis:** How objects are highlighted
- **Exit:** How objects leave the slide
- **Motion Paths:** How objects move

6.4 Animation Options

Option	Description
Start	On Click, With Previous, After Previous
Duration	Length of animation (seconds)
Delay	Wait time before animation starts
Effect Options	Direction, sequence, etc.
Animation Painter	Copy animation to other objects

6.5 Animation Effects

Entrance Effects

- Appear, Fade, Fly In, Float In, Split, Wipe, Shape, Wheel

Emphasis Effects

- Grow/Shrink, Spin, Bounce, Pulse, Color Pulse, Teeter

Exit Effects

- Disappear, Fade Out, Fly Out, Float Out, Split, Wipe

6.6 Setting Animation Timing

Steps:

1. Select the animation
2. Animations Tab → Timing group
3. Set:
 - **Start:** On Click, With Previous, After Previous
 - **Duration:** Time in seconds
 - **Delay:** Time before start
 - **Order:** Animation sequence

7. Slide Show Setup

7.1 Starting a Slide Show

Action	Method
From Beginning	Slide Show Tab → From Beginning (or press F5)
From Current Slide	Slide Show Tab → From Current Slide (or Shift+F5)
Custom Slide Show	Slide Show Tab → Custom Slide Show

7.2 Slide Show Navigation

Key	Action
N, Space, Page Down	Next Slide
P, Page Up	Previous Slide
B	Black Screen
W	White Screen
ESC	End Slide Show

7.3 Set Up Slide Show

Options:

- **Show Type:** Presented by speaker, Browsed by individual, Browsed at kiosk
- **Show Options:** Loop continuously, Show without narration, Show without animation
- **Advance Slides:** Manually or Using timings

8. Master Slide

8.1 What is a Master Slide?

A Master Slide is a **template slide** that controls the overall look and formatting of all slides in a presentation. Changes made to the master slide are reflected on all slides.

8.2 Types of Masters

Master Type	Description
Slide Master	Controls all slide layouts
Title Master	Controls title slide layout
Handout Master	Controls handout pages
Notes Master	Controls speaker notes

8.3 Accessing Slide Master

Steps:

1. View Tab → Slide Master
2. Edit the master slide
3. Click Close Master View to exit

What Can Be Changed?

- Background and colors
- Fonts and font sizes
- Placeholder positions
- Logo and footer
- Layouts

8.4 Modifying Slide Master

Item	How To Change
Background	Right-click → Format Background
Colors	Design Tab → Colors
Fonts	Design Tab → Fonts
Effects	Design Tab → Effects
Footer	Insert Tab → Header & Footer
Logo	Insert Tab → Picture

9. Action Buttons

9.1 What are Action Buttons?

Action buttons are **interactive buttons** that perform specific actions when clicked during a slide show.

9.2 Types of Action Buttons

Button	Action
Home	Go to first slide
Previous	Go to previous slide
Next	Go to next slide
Last Slide	Go to last slide
Document	Open a document
Sound	Play a sound
Movie	Play a movie

9.3 Adding Action Buttons

Steps:

1. Insert Tab → Shapes → Action Buttons
2. Choose a button type
3. Click and drag to draw the button
4. In the Action Settings dialog:
 - Hyperlink to: Choose a destination
 - Sound: Choose a sound effect
 - Run program: Specify a program

5. Click OK

9.4 Using Action Buttons for Navigation

Step 1: Add the Button

1. Insert Tab → Shapes → Action Buttons → Custom
2. Click and drag to draw the button
3. The Action Settings window opens

Step 2: Set Action

- **Mouse Click Tab:**
 - Hyperlink to → Slide → Select slide
 - or Hyperlink to → Next/Previous Slide
 - Check "Play Sound" (optional)

Step 3: Customize

- Right-click button → Format Shape
- Change fill color, outline, shadow, etc.

10. Views in PowerPoint

10.1 Types of Views

View	Description	How to Access
Normal View	Default view (Slides + Outline + Notes)	View → Normal
Slide Sorter View	All slides as thumbnails	View → Slide Sorter
Reading View	Full screen reading	View → Reading View
Slide Show View	Full screen presentation	Slide Show → From Beginning
Outline View	Only text outline	View → Outline View
Notes Page View	View speaker notes	View → Notes Page

10.2 Normal View

The **default view** in PowerPoint consists of three panes:

1. **Slides Pane:** Thumbnails of all slides
2. **Main Slide Area:** Current slide editing
3. **Notes Pane:** Speaker notes

10.3 Slide Sorter View

Purpose: View all slides as thumbnails for easy rearrangement.

Actions in Slide Sorter View:

- Drag and drop to reorder slides
- Delete slides
- Add or duplicate slides
- Copy slides between presentations

10.4 Slide Show View

Purpose: View the presentation as it would appear to an audience.

Starting a Slide Show:

- Slide Show Tab → From Beginning (F5)
- Slide Show Tab → From Current Slide (Shift+F5)

11. Saving and Exporting

11.1 Saving a Presentation

Steps:

1. Office Button → Save (or press Ctrl+S)
2. Choose location
3. Enter file name
4. Choose file format
5. Click Save

11.2 File Formats

Format	Extension	Description
PowerPoint Presentation	.pptx	Default PowerPoint 2007 format
PowerPoint 97-2003	.ppt	Compatible with older versions
PowerPoint Show	.ppsx	Opens directly in slide show view
PDF	.pdf	Portable Document Format
XPS Document	.xps	XML Paper Specification
Video	.wmv	Windows Media Video

11.3 Exporting Options

Create PDF/XPS Document:

1. Office Button → Save As → PDF or XPS
2. Choose file name and location
3. Click Publish

Package for CD:

1. Office Button → Publish → Package for CD
2. Add files and copy to CD

12. Quick Revision

PowerPoint Components Summary

PowerPoint 2007

- |
- |— Presentation (.pptx)
 - | |— Slides
 - | | |— Title Slide
 - | | |— Content Slides
 - | | |— Section Slides
 - | |— Slide Master
 - | |— Notes
- |
- |— Views
 - | |— Normal View
 - | |— Slide Sorter
 - | |— Reading View
 - | |— Slide Show
- |
- |— Ribbon Tabs
 - | |— Home
 - | |— Insert
 - | |— Design
 - | |— Animations
 - | |— Slide Show
 - | |— Review
 - | |— View
- |
- |— Animations
 - | |— Entrance
 - | |— Emphasis
 - | |— Exit
 - | |— Motion Paths

Keyboard Shortcuts

Shortcut	Action
----------	--------

Ctrl+N	New Presentation
Ctrl+O	Open Presentation
Ctrl+S	Save Presentation
Ctrl+P	Print
Ctrl+M	New Slide
Ctrl+C	Copy
Ctrl+V	Paste
Ctrl+X	Cut
Ctrl+Z	Undo
Ctrl+Y	Redo
F5	Start Slide Show
Shift+F5	Start Slide Show from Current Slide

Important Full Forms

Abbreviation	Full Form
PPT	PowerPoint Presentation
PPTX	PowerPoint XML Format
PPS	PowerPoint Slide Show
GIF	Graphics Interchange Format
JPEG	Joint Photographic Experts Group
PNG	Portable Network Graphics

13. Questions

13.1 Short Answer Questions (2-5 Marks)

1. What is MS PowerPoint? What are its features?
2. What is a slide layout? Name different layouts.
3. What is Slide Master? Why is it used?
4. What are the different views in PowerPoint?
5. What is animation? Name different animation types.
6. What is a transition? Give examples.
7. How do you add sound to a presentation?
8. How do you add video to a presentation?
9. What are action buttons? Give examples.
10. What is SmartArt? How is it used?
11. What are macros? How are they recorded?
12. What is the Ribbon in PowerPoint 2007?
13. What is WordArt? How is it used?
14. How do you insert a picture in PowerPoint?
15. What is the difference between animation and transition?

13.2 Long Answer Questions (10 Marks)

1. Explain the features and benefits of MS PowerPoint 2007.
2. Explain the PowerPoint interface components in detail.
3. Explain how to create and edit slides in PowerPoint.
4. Explain inserting graphics, multimedia, and special effects in slides.
5. Explain Slide Master and its uses.
6. Explain different views in PowerPoint.
7. Explain animation and transition effects in PowerPoint.
8. Explain action buttons and macros in PowerPoint.
9. Explain how to insert pictures, slides, and text in PowerPoint.
10. Explain how to use SmartArt and WordArt in presentations.

13.3 Objective Questions (1 Mark)

1. MS PowerPoint is used for:
(a) Word Processing (b) Spreadsheet (c) Presentations (d) Database

Answer: (c)

2. The default file extension of PowerPoint 2007 is:
(a) .ppt (b) .pptx (c) .pps (d) .potx

Answer: (b)

3. Which key is used to start a slide show from the beginning?
(a) F5 (b) F6 (c) F7 (d) F8

Answer: (a)

4. The normal view has:
(a) Slides and Outline (b) Slides and Notes (c) Both (d) None

Answer: (c)

5. Which effect moves text on or off a slide?
(a) Transition (b) Animation (c) Both (d) None

Answer: (b)

6. Which effect changes between slides?
(a) Transition (b) Animation (c) Both (d) None

Answer: (a)

7. Slide Master controls:
(a) One slide (b) All slides (c) Selected slides (d) None

Answer: (b)

8. Action buttons are used for:
(a) Navigation (b) Animation (c) Formatting (d) None

Answer: (a)

9. SmartArt is used for:
(a) Diagrams (b) Images (c) Audio (d) Video

Answer: (a)

10. WordArt is used for:
(a) Text styling (b) Image styling (c) Both (d) None

Answer: (a)
